Question 1: What is the total number of payouts made by each seller segment in July 2024?

```
SELECT
    s.seller_segment AS seller_segment,
    COUNT(p.payout_id) AS total_payouts
FROM fct_payouts AS p
LEFT JOIN dim_sellers AS s
    ON p.seller_id = s.seller_id
WHERE p.payout_status = 'successful'
    AND p.payout_date BETWEEN '2024-07-01' AND '2024-07-31'
GROUP BY s.seller_segment;
```

Question 2: Identify the seller segment with the highest payout success rate in July 2024 by comparing successful and failed payouts.

```
SELECT
    s.seller_segment AS seller_segment,
    COUNT(CASE WHEN p.payout_status = 'successful' THEN 1 END) AS successful_payouts,
    COUNT(CASE WHEN p.payout_status = 'failed' THEN 1 END) AS failed_payouts,
    -- Calculate success rate, avoiding division by zero
    SUM(CASE WHEN p.payout_status = 'successful' THEN 1 ELSE 0 END)
    * 100.0 /
    COUNT(p.payout_id) AS success_rate_percentage
FROM fct_payouts AS p
LEFT JOIN dim_sellers AS s
    ON p.seller_id = s.seller_id
WHERE p.payout_date BETWEEN '2024-07-01' AND '2024-07-31'
GROUP BY s.seller_segment
ORDER BY success_rate_percentage DESC;
```

Question 3: What percentage of payouts were successful versus failed for each seller segment in July 2024, and how can this be used to recommend targeted improvements?

```
SELECT
    s.seller_segment AS seller_segment,
    COUNT(CASE WHEN p.payout_status = 'successful' THEN 1 END) * 100.0 / NULLIF(COUNT(p.payout_id), 0) AS success_rate_percentage,
    COUNT(CASE WHEN p.payout_status = 'failed' THEN 1 END) * 100.0 / NULLIF(COUNT(p.payout_id), 0) AS failed_rate_percentage
FROM fct_payouts AS p
LEFT JOIN dim_sellers AS s
    ON p.seller_id = s.seller_id
WHERE p.payout_date BETWEEN '2024-07-01' AND '2024-07-31'
GROUP BY s.seller_segment
ORDER BY success_rate_percentage DESC;
```
