

Meta

As a member of the Marketing Analytics team at Meta, you are tasked with evaluating the performance of branded AR filters....

Question 1: Which AR filters have generated user interactions in July 2024? List the filters by name.

```
SELECT DISTINCT
    f.filter_name
FROM ar_filter_engagements AS fe
INNER JOIN ar_filters AS f
    ON fe.filter_id = f.filter_id
WHERE fe.engagement_date BETWEEN '2024-07-01' AND '2024-07-31'
    AND fe.interaction_count > 0;
```

Question 2: How many total interactions did each AR filter receive in August 2024? Return only filter names that received over 1000 interactions, and their respective interaction counts.

```
SELECT
    f.filter_name,
    SUM(fe.interaction_count) AS total_interactions
FROM ar_filter_engagements AS fe
INNER JOIN ar_filters AS f
    ON fe.filter_id = f.filter_id
WHERE fe.engagement_date BETWEEN '2024-08-01' AND '2024-08-31'
GROUP BY f.filter_name
HAVING SUM(fe.interaction_count) > 1000;
```

Question 3: What are the top 3 AR filters with the highest number of interactions in September 2024, and how many interactions did each receive?

```
SELECT
    f.filter_name,
    SUM(fe.interaction_count) AS total_interactions
FROM ar_filter_engagements AS fe
INNER JOIN ar_filters AS f
    ON fe.filter_id = f.filter_id
WHERE fe.engagement_date BETWEEN '2024-09-01' AND '2024-09-30'
GROUP BY f.filter_name
ORDER BY SUM(fe.interaction_count) DESC
LIMIT 3;
```
