Question 1: What is the total number of messages sent during April 2024? This information will help us quantify overall engagement as a baseline for targeted product enhancements.

```
SELECT
    COUNT(*) AS total_messages_in_april
FROM fct_messages
WHERE message_sent_date BETWEEN '2024-04-01' AND '2024-04-30';
```

Question 2: What is the average number of messages sent per user during April 2024? Round your result to the nearest whole number. This metric provides insight into individual engagement levels for refining our communication features.

```
SELECT
    ROUND(AVG(message_count)) AS average_messages_per_user
FROM (
    SELECT
        user_id,
        COUNT(message_id) AS message_count
    FROM fct_messages
    WHERE message_sent_date BETWEEN '2024-04-01' AND '2024-04-30'
    GROUP BY user_id
) user_messages;
```

Question 3: What percentage of users sent more than 50 messages during April 2024? This calculation will help identify highly engaged users and support recommendations for enhancing messaging interactions.

```
SELECT
    (COUNT(CASE WHEN total_messages_by_user > 50 THEN 1 END) *
    100.0) / COUNT(*) AS "high-engagement users"
FROM (
    SELECT
        COUNT(message_id) AS total_messages_by_user
    FROM fct_messages
    WHERE message_sent_date BETWEEN '2024-04-01' AND '2024-04-
    30'
    GROUP BY user_id
) total;
```
