You are a Data Analyst in the Physical Stores Pricing Strategy team, working to ensure competitive pricing for essential household items....

Question 1: What is the total sales volume (i.e. total quantity sold) for essential household items in July 2024? Provide the result with a column named 'Total_Sales_Volume'.

```
SELECT
    SUM(s.quantity_sold) AS Total_Sales_Volume
FROM fct_sales AS s
INNER JOIN dim_products AS p
    ON s.product_id = p.product_id
WHERE p.category = 'Essential Household'
    AND s.sale_date BETWEEN '2024-07-01' AND '2024-07-31';
```

Question 2: For essential household items sold in July 2024, categorize the items into 'Low', 'Medium', and 'High' price ranges based on their average price. Use the following criteria: 'Low' for prices below \$5, 'Medium' for prices between \$5 and \$15, and 'High' for prices above \$15.

```
SELECT
    p.product_name,
    AVG(s.unit_price) AS average_price,
    CASE
        WHEN AVG(s.unit_price) < 5.00 THEN 'Low'
        WHEN AVG(s.unit_price) BETWEEN 5.00 AND 15.00 THEN 'Medium'
        ELSE 'High'
    END AS category
FROM fct_sales AS s
INNER JOIN dim_products AS p
    ON s.product_id = p.product_id
WHERE s.sale_date BETWEEN '2024-07-01' AND '2024-07-31'
GROUP BY p.product_name;
```

Question 3: Identify the price range with the highest total sales volume for essential household items in July 2024. Use the same criteria as the previous question: 'Low' for prices below \$5, 'Medium' for prices between \$5 and \$15, and 'High' for prices above \$15.

Provide the result with columns named 'Price_Range' and 'Total_Sales_Volume'.

```
SELECT
    CASE
        WHEN s.unit_price < 5 THEN 'Low'
        WHEN s.unit_price BETWEEN 5 AND 15 THEN 'Medium'
        ELSE 'High'
    END AS Price_Range,
    SUM(s.quantity_sold) AS Total_Sales_Volume
FROM fct_sales AS s
JOIN dim_products AS p
    ON s.product_id = p.product_id
WHERE p.category = 'Essential Household Items'
    AND s.sale_date >= '2024-07-01'
    AND s.sale_date < '2024-08-01'
GROUP BY
    CASE
        WHEN s.unit_price < 5 THEN 'Low'
        WHEN s.unit_price BETWEEN 5 AND 15 THEN 'Medium'
        ELSE 'High'
    END
ORDER BY Total_Sales_Volume DESC
LIMIT 1;
```
